1 Figures

There are two wonderful packages in LaTeX to create figures TikZ and PGFPlots. The former can be used to create any kind of vector graphic, the latter focuses on plots. Together they can create almost any kind of figure you need for a paper. Use them. Here, some examples from a recent paper [1]:

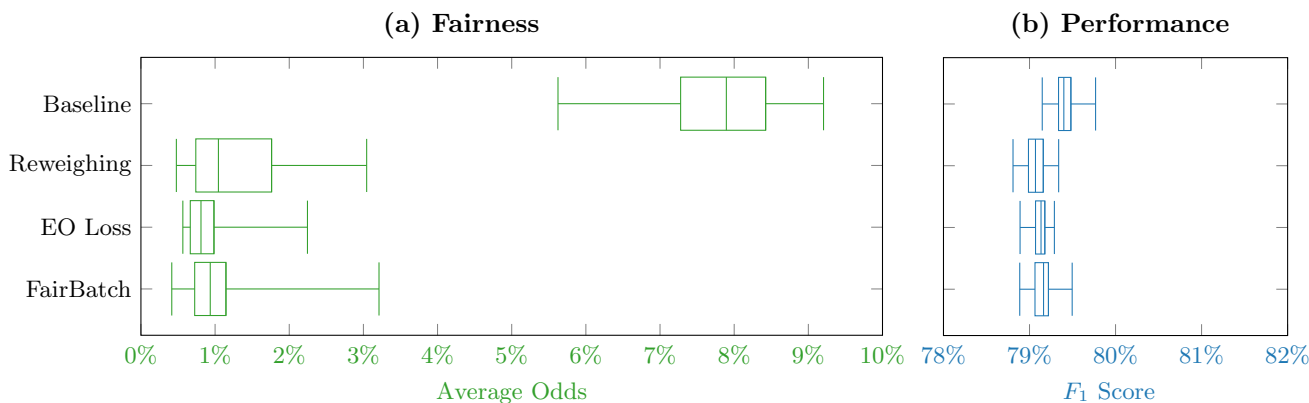

Figure 1: Some box plots

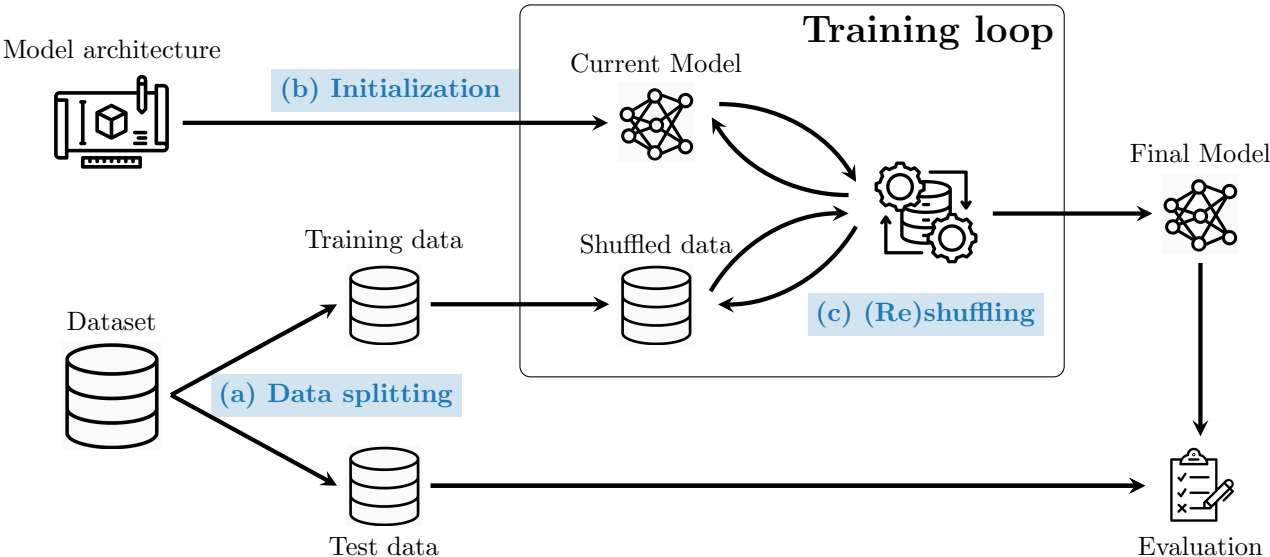

Figure 2: An overview

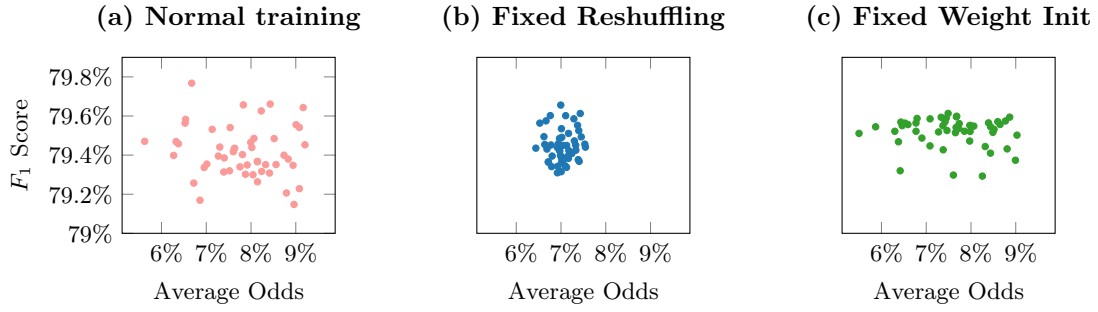

Figure 3: Some scatterplots

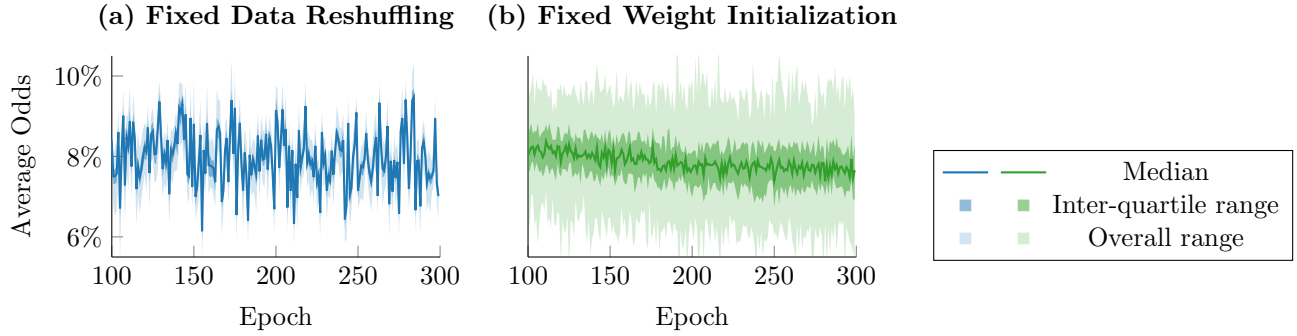

Figure 4: And some line plots with a legend

2 Tables

Use the booktabs package. Ideally only have three horizontal lines. Don't have vertical lines! Generally follow the advise here.

Table 1: Some tables

(a) Different Datasets			(c) Changing Hyperparameters		
	Fixed RR	Fixed WI		Fixed RR	Fixed WI
ACSIIncome	.94	.04	Default Hyperparameters	.94	.04
ACSEmployment	.89	.01	Batch Size = 16	.95	.00
CelebA	.92	.01	Learning Rate = 0.01	.93	.00
(b) Different Fairness Metrics			Arch = {2048, 64}	.92	.00
	Fixed RR	Fixed WI	No Dropout	.94	.04
Average Odds	.94	.04	Dropout Rate = 10%	.88	.03
Equal Opportunity	.94	.05	Dropout Rate = 20%	.85	.04
Demographic Parity	.96	.03	Dropout Rate = 30%	.80	.13
